THE DETAIL

LIFTING EQUIPMENT

PML offer an extensive range of products and services from small shackles to a full design, supply and installation of an overhead travelling crane. We offer LOLER thorough examinations and inspections as required across a broad spectrum of industries. We carry out work for clients within the petro chemical, shipping, construction, pharmaceutical, theatre and ship building industries.

CRANES

All crane work is undertaken to the highest standard keeping your equipment reliable and compliant to current legislations. Enquiries are welcome on all modifications including wireless conversions, extensions, uprating WLL and additional hoists.

HEIGHT SAFETY

Height safety equipment comes in many forms. PML have the knowledge and skills to help you choose the most suitable equipment for your application. We can design, supply and install.

MARINE EQUIPMENT

PML can supply an extensive range of products for use within a marine environment. Stainless steel products, cargo and lashing, wire and fibre rope and specialist components.

INDUSTRIAL RACKING / DOORS / DOCK LEVELLERS

PML offer a full inspection, maintenance and repair service on all types of industrial doors and dock levellers. We can also carry out load testing and periodic examination of industrial racking.
